

(A) tonic spiking

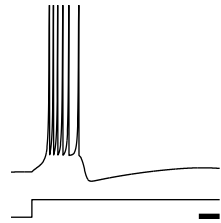

(B) phasic spiking

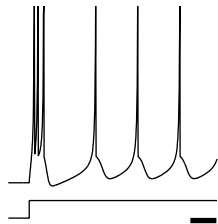

(C) tonic bursting

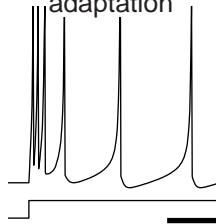

(D) phasic bursting

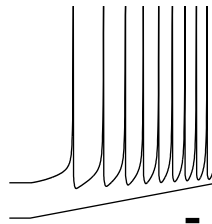

(E) mixed mode

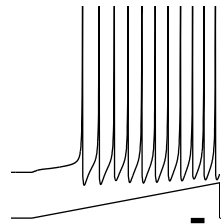

(F) spike frequency adaptation

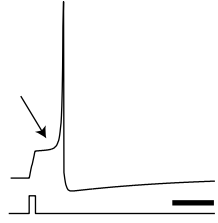

(G) Class 1 excitable

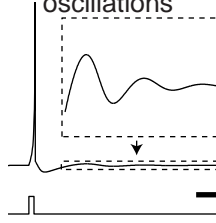

(H) Class 2 excitable

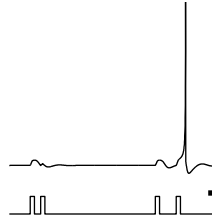

(I) spike latency

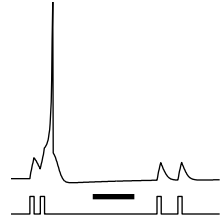

(J) subthreshold oscillations

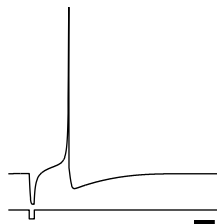

(K) resonator

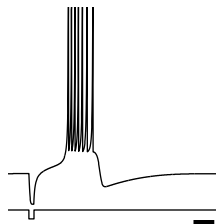

(L) integrator

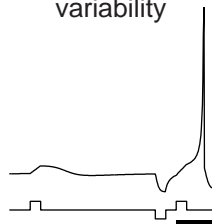

(M) rebound spike

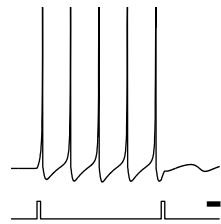

(N) rebound burst

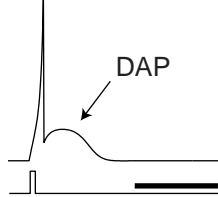

(O) threshold variability

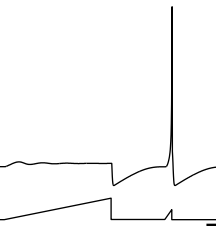

(P) bistability

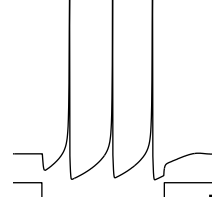

(Q) depolarizing after-potential

(R) accommodation

(S) inhibition-induced spiking

(T) inhibition-induced bursting
